

Formtex is a semi-rigid lightweight hose with unique features. Formtex is unbeatable as a fire hose and a fantastic working tool both ergonomically and financially.

## **Formtex Ultra**

Semi-rigid fire hose, designed to be as lightweight as possible. Specially adapted for indoor hose reels.

## **Formtex Ultra Extra**

Perfect for replacing hoses in hose reels.

## **Formtex Industri**

Manufactured to meet the tough requirements of industry.

## **Formtex Industri Extra**

Even stronger, with fluorescent marking.

## **Formtex Industri Extra S**

Higher burst pressure, higher abrasion resistance.

## **Why Formtex?**

- Remarkable flexibility, much better than other hose types.
- Can cope with extreme bends, with low friction against flooring and obstacles.
- Amazingly lightweight. One third the weight of standard rubber or plastic hoses.
- Highly durable, with a very high burst pressure despite the low weight.
- Outstanding ageing resistance thanks to 100 % EPDM rubber and polyester construction.
- Incredibly flexible even at very low temperatures
- Certified as follows:

Industri, Ultra and Ultra Extra: SSEN694. Industri Extra: SSEN 694/SSEN 1947.

| Type             | Nominal int. diam. mm | Nominal ext. diam. mm | Burst pressure MPa | bar | Weight g/m | Bending diameter mm | Colours<br>white black red |   |   |

## Formtex

Formtex is a fire and industrial hose, constructed with a circular woven hose jacket made of polyester fabric and a vulcanised inner tube made of 100% EPDM rubber. The hose is available in a number of versions. Formtex Ultra is mostly used in hose reels/cabinets. The specially-adapted Ultra Extra is special designed to be used to convert older hose in hose reels.

The Formtex hose has significant ergonomic benefits. It is extremely flexible and lightweight, with low friction, making it much more pliable than other hose types. This and the very high burst pressure and good ageing resistance are an unbeatable combination, not just for fire fixed fire hose reels, but also for use as general equipment. If the hose is used in day-to-day activities, choose one of the industrial hoses.
