

Svebab – Svenska Brandslangsfabriken AB – is the only manufacturer in the Nordic region of circular woven lay-flat and semi-rigid hose. We are located in Skene, in the municipality of Mark, about 60 km east of Gothenburg in Sweden.

The type of hose we manufacture is best known as fire hose, and it is in this area that we have made a name for ourselves in large parts of the world, not least as a company that really supplies quality.

Thanks to our long years of experience and the expertise we have built up, we have been able to develop our hoses so that today they are in the absolute top class.

This is also the reason why we have succeeded in developing the hoses further, so that they can additionally be used in many other areas.

We also supplement our range with products from other manufacturers, setting the same strict quality requirements with regard to quality for our subcontractors as we do for ourselves. We choose our subcontractors with care.

Svebab today is a totally unique and complete supplier.
